

ENIAC, Electronic Numerical Integrator and Computer, and program "computers"

HIST 651: Reading Seminar in American History

Science, Technology & Society

This course introduces students to the variety of ways that science and technology have been understood, historicized, and studied as cultural practices. We will examine the social processes by which scientific and technical knowledge is used, reconfigured, and contested. Attention will be given to the ways in which culture shapes, and is shaped by, science and technology.

Fall 2019 W 3:30-6:20 UNIV 319
