COURSE OVERVIEW
The purpose of this course is to provide students with a historical understanding of the role public health and medicine has played in American history during the 19th and 20th centuries. How does the health status of Americans reflect and shape U.S. history? How do ideas about medicine and health reflect broader attitudes and values in American history and culture? What are the responsibilities of the state and of the individual in preserving health? How has science and technology altered our understanding of risk and responsibility? We will examine the history and current situation of American public health, which is simultaneously a field of scientific activity, a vehicle for social reform, and a site of political controversy.

LEARNING OUTCOMES
The course is designed to help you understand how and why public health and medicine have evolved over the course of the past two centuries. Through readings, lectures, discussion, and written assignments, students will learn to identify and analyze how scientific beliefs and social anxieties contribute to policies and practices of medicine and health. This course will demonstrate how different historical actors and institutions – doctors, public health officials, patients, hospitals, and activists – have competed and sometimes collaborated to institute public health reforms. Students will also develop critical thinking skill to assess the impact of these reforms on everyday life.

*This course meets requirements for Purdue's Medical Humanities Certificate. Students interested in the Medical Humanities certificate should review the website and contact their academic advisor for more information.
This syllabus is subject to change and will be updated on Brightspace as needed.

Important Notes:

*Cheating / Plagiarism*: Academic integrity is one of the highest values that Purdue University holds. Individuals are encouraged to alert university officials to potential breaches of this value by either emailing integrity@purdue.edu or by calling 765-494-8778. While information may be submitted anonymously, the more information is submitted the greater the opportunity for the university to investigate the concern. More details are available on our course Brightspace table of contents, under University Policies.

*Email etiquette*: Outside of class or office hours, communicate with your professor by email. State the reason for your email in the subject line (ex: “question about essay”).
Include a full salutation (ex: “Dear Professor”), and closing with your full name (ex: “Sincerely, Robert Owen”). Please use full sentences, correct grammar, and punctuation. *Electronic Devices in the Classroom:* Please do not use electronic devices during class. No iPhones, iPads, or laptops. Otherwise your casual meanderings around the World Wide Web will distract everyone around you. If you want to take notes (which I highly recommend), use pen/pencil and paper. If we are discussing the reading and you only have access to it on a laptop or iPad, let me know in advance.

Final paper due: Wednesday Dec 13 by 5 p.m. via Brightspace. Details will be provided by the last week of the semester.

**EXPLANATION OF INTELLECTUAL JOURNAL**
Each person in the course will be expected to write two journal entries on Brightspace. The purpose of this journal is to encourage students to reflect on the readings and material covered in the course and thereby, to help students prepare for in-class discussions. On a larger scale, the journal will help you and me track the development of your intellectual understanding and questioning throughout the course. You are required to write a total of TWO journal entries. There are FOUR possible dates for entries to come in: 9/12, 10/5, 11/7, 12/7

*Here’s the catch: I won’t accept any late entries.* They are due by 9 a.m. on those dates via Brightspace.

-Please write a total of **400-500 words per entry.** That’s about two typed double-spaced pages. Write in full sentences and in clearly organized paragraphs. Demonstrate that you’ve engaged in some way with the reading material. Feel free to link the reading with discussions we’ve had in class or with previous readings, but be sure to focus primarily on the actual assigned chapters. How is this author approaching the subject matter? What kinds of issues are raised by this particular subject? What sources is the author using, and what argument is he or she making? (i.e. why does the subject matter? Why should we care about it?)

**PANDEMIC PAPER:**
**Due: 9/7 by 9 a.m.**
For this assignment, draw on your notes and class discussions from the films Totally Under Control and All in My Power to analyze the impact of the pandemic on public
health and medicine in the U.S. According to the films, what deeper systemic issues or problems came to light as a result of how the pandemic played out in the U.S.? You may also draw on your own experiences during the pandemic, but be sure to tie these experiences into the broader themes and issues emphasized in these two documentaries, and be sure to provide specific examples from the films.

Length: 1000 words (12-point font, double spaced).

**FINAL PAPER:**

**Due: 12/14 by 5 p.m.**

The final paper assignment will be distributed in early December. It will be in essay format and based on readings, lectures, films, and in-class discussions. No outside research or reading will be required for the assignment.

**This rubric may help you succeed on these assignments:**

17 (B): Solid, but may have one weaker element. Clearly written, no errors.

16 (B-): Solid but may include some errors.

14 (C): Hard to read. Includes errors.

**IMPORTANT NOTES AND PROCEDURES:**

**Attendance Policy:**

Regular attendance is expected. Quizzes will take place at the beginning of the class and are part of your attendance grade (which counts for 2% of your total grade). You will not be allowed to make up the quiz unless you have a documented excuse for your absence. If there is an occasion where you must leave early, notify me before class starts and sit near an exit. We will also be having regular class discussions and your input is valued!

**University policy:**

“The University expects that students will attend classes for which they are registered. At times, however, either anticipated or unanticipated absences can occur. The student bears the responsibility of informing the instructor in a timely fashion, when possible. The instructor bears the responsibility of trying to accommodate the student either by excusing the student or allowing the student to make up work, when possible. The University expects both students and their instructors to approach problems with class attendance in a manner that is reasonable.”
