

SPRING 2019

GER 323

German for Science and Engineering (an alternative to GER 302)

MWF
10:30-11:20

GER 323 focuses on the language used in the fields of science and engineering. Become familiar with technical vocabulary in your field and the style of German scientific articles. Prepare for an international career!

Ideal course for engineering or science majors, and everybody interested in science or engineering!

Course materials include current articles and videos from German media and excerpts from science books.

Instructor: Dr. Marc Rathmann (rathman@purdue.edu)
